

Proment – project management

Proment is proud to present its **Master Die Set Systems**

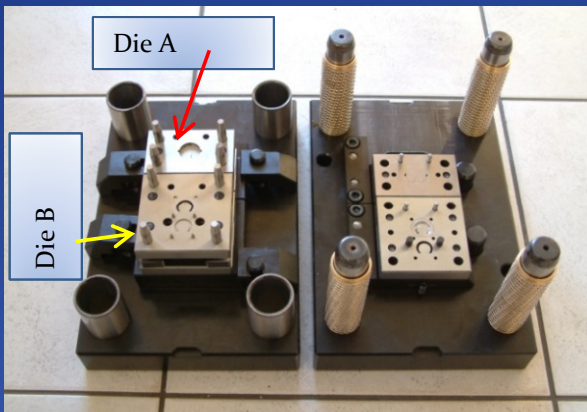

Proment specializes in manufacturing of tooling and equipment for the Jewelry mass production automated facilities .

Proment Master Die Set system can save the jewelry manufacturer hundreds thousands \$\$\$ in ownership costs of multiple sets of progressive dies.

Proment guarantees the user of this Master Die Set coupled with Proment Digital Feeder that it takes only 52 seconds to replace a progressive die, set up the pitch and start work !

Proment 8 ton press with integral digital feeder and Master Die Set.

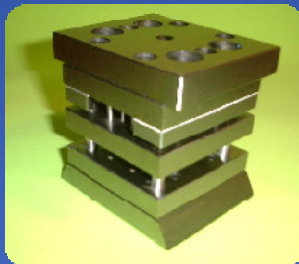

Proment Master Die Set consists of an A Section and B Section. Section A contains just the repeating operations plates, while Section B contains the different product operations plates.

The main advantages of this system are:

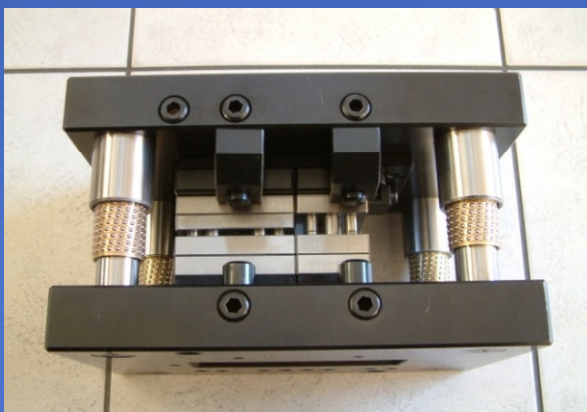

- Fast set up of dies in the press suited for un-trained worker - "Idiot Proof" design.
- Fast clamping of die plates using one tool only.
- Saving of 40% on your production costs,

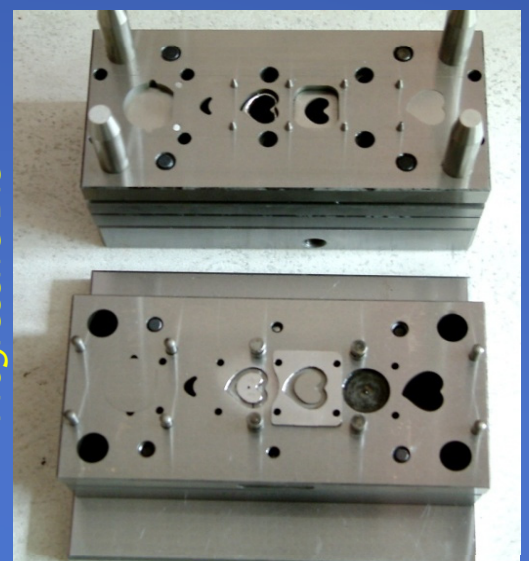

First Die

Second Die

Progressive Die

We can take any manufacturing challenge and turn it to a solution.
