

Proment – project management

Proment is proud to present its PAM - Production Automated Machines for Jewelry shaping, soldering & assembly.

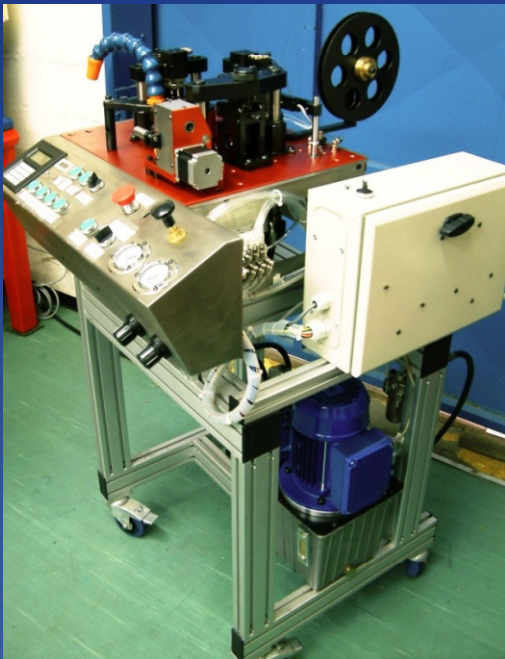

The **PAM product line**, is designed and built by **Proment** offers the very latest equipment for the modern Jewelry automated manufacturing & mass assembly operations.

These **machines** have been designed to meet the needs of small operations required at the final assembly of precious metal jewelry, such as in prong settings, earrings, posts and fish – locks.

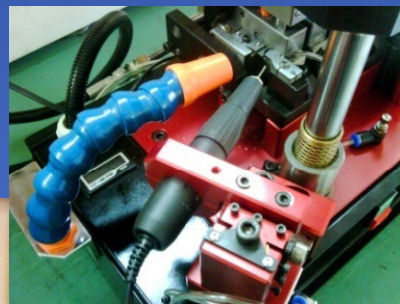

Proment PAM ACC1 fully automated soldering machine of accessories to complete earrings.

This is a platform based on universal fully adjustable stations, which handles soldering, paste dispensing, activating soldering torches, automatic part-feeding and small mechanical operations such as bending and forming blanks.

Fully Automated Soldering Machine

Bar Production Automated Machine

Bar automated machine equipped with micro-motor kit truncating and rounding bar sharp edge.
